

PROSEP LAUNCHES NEW WAVE OF PRODUCED WATER TREATMENT SOLUTIONS

- ProSep now offers a complete line of solutions for the treatment of produced water -

MONTREAL, QUEBEC – February 23, 2009 - ProSep Inc. (TSX: PRP), dedicated to providing process solutions to the oil and gas industry, today announced the launch of a new line of conventional produced water solutions. ProSep's produced water experts can now offer a complete range of conventional and proprietary treatment equipment to address this growing segment of the onshore and offshore oil and gas industry. This new conventional process equipment line, developed by the Company's Houston operations, will complement ProSep's existing state-of-the-art proprietary solutions for oil and gas treatment such as TORR™, CTour® and Sorbfloc.

"We are positioning ourselves to offer the industry's most comprehensive suite of produced water treatment solutions," said Jacques L. Drouin, President and CEO of ProSep Inc. "Our clients will now benefit from our extensive produced water expertise through operations located in Houston, Bergen, Bahrain and Kuala Lumpur."

Water production is forecasted to increase as the world's portfolio of producing wells continues to age. Currently, 211 million barrels of water per day are produced along with the average daily oil production of 85 million barrels.

For more information on our complete line of products and services, including oil, gas and produced water solutions, go to www.prosep.com.

About ProSep Inc.

ProSep Inc. is dedicated to providing process solutions to the oil and gas industry. ProSep designs, develops, manufactures and commercializes technologies to separate oil, water and gas generated by oil and gas production. For more information, please visit www.prosepinc.com.
