

**PRESS RELEASE
FOR IMMEDIATE DISTRIBUTION**

TORR Canada Awarded Engineering Contract by Worley Parsons and BP Exploration

MONTREAL, QUEBEC – January 28, 2008 - TORR Canada Inc. (TSX: TOR) ("TCI" or the "Company"), dedicated to providing process solutions to the Oil and Gas industry, today announced that its American business unit, ProSep Technologies, Inc, has been awarded a contract by Worley Parsons to provide services to BP Exploration (Alaska). The initial portion of the contract is for engineering and design services representing approximately US\$850,000 and could be worth \$4.95 million should the contract include the supply of gas separation equipment.

Under the terms of the agreement, TCI will immediately commence servicing BP Exploration's WRDx Gas Partial Processing ("GPP project"), located in Prudhoe Bay. The potential second portion of the contract, for the delivery in the spring of 2009 of gas separation equipment for produced reservoir fluids, will be determined within the next few months.

"I am very proud of our American business unit which is experiencing fast growth and continues to win customers' confidence and is increasingly attracting the attention of major producers such as BP Exploration and important oilfield services companies such as Worley Parsons," said Jacques L. Drouin, President and CEO of TORR Canada Inc. "We have highly experienced engineers in our Houston-based operation and I am confident that both Worley Parsons and BP Exploration will be very satisfied with the results of this first phase."

Prudhoe Bay, North America's largest oil field, has experienced a steady decline in production since reaching its peak in 1987," said Lew Mologne, President of ProSep Technologies and General Manager of the American business unit. "We are extremely excited to have been selected by Worley Parsons as our expertise in the treatment of gas will contribute to BP Exploration's efforts to increase reservoir production at the GPP project."

With this contract, excluding the potential balance mentioned above, TORR Canada's sales backlog to date reaches \$23 million.

About TORR Canada Inc.

TCI is dedicated to providing process solutions to the Oil and Gas industry. TCI designs, develops, manufactures and commercializes technologies to separate oil, water and gas generated by Oil and Gas production. TCI recently acquired Pure Group AS of Norway.
