

Attention Business Editors:

TORR Canada provides an update following the acquisition of Pure Group

-Approximately \$US 2 million in contracts awarded recently-

MONTREAL, Oct. 30 /CNW/ - TORR Canada Inc. (TSX: TOR) ("TCI"), dedicated to providing innovative process solutions to the Oil & Gas industry, today provides an update following its acquisition of Pure Group AS. During the last few weeks, two of the recently acquired business units have concluded the sale of three oil and gas treatment systems for total considerations of approximately US \$2 million. Delivery of two of these systems is expected to occur before the end of 2007. The third system will be delivered in the first half of 2008. Revenue and expected gross profit will be recorded on a progress basis and will be reflected in TCI's future financial results.

"We are pleased with the immediate contributions Pure Group's business units are making to our overall sales. The systems sold consist of conventional and novel technologies and in one instance, a repeat sale." said Alain Ferland, President and Chief Executive Officer of TORR Canada. "The sale of more traditional equipment, such as gas membranes will help stabilize our revenue stream by providing regular cash flow from operations and sustained growth. Further, the acquisition of these business units now provides us with a more complete portfolio of complementary novel technologies that are gaining increased market acceptance."

ProSep Technologies, based in Houston, Texas, recently completed the sale of a gas membrane unit to one of North America's largest oil and gas producers. This conventional technology is used for removal of CO<sub>2</sub>, H<sub>2</sub>S and H<sub>2</sub>O. In 2006, ProSep supplied the pretreatment and membrane separation equipment to this same customer for a different West Texas project. This new contract represents the first phase of a two phase project.

ProPure, based in Bergen, Norway, recently completed the sale of two novel proprietary mixers to major oil producers in the Middle East and Central America. This newly commercialized mixer is used to enhance conventional desalting in oil treatment, while reducing chemical use and water consumption.

#### About TORR Canada Inc.

TCI is dedicated to providing solutions to the oil and gas industry. TCI designs, develops, manufactures and commercializes technologies to separate oil, water and gas generated by oil and gas production. For more information, please visit [www.torrcanada.com](http://www.torrcanada.com). TCI recently acquired Pure Group AS of Norway.
